Press release

## MSI bundles with Super LoiLoScope for NVIDIA graphic cards

-Ultimate full HD video editing-

January 29<sup>th</sup> 2010 – LoiLo inc. with its principle place of business at Endo, Fujisawa, Japan, CEO: Koji Sugiyama, bundled with MSI, a world leading graphic card/main board manufacturer, with world’s first GPU accelerated video editing software, Super LoiLoScope, to all MSI NVIDIA® GeForce™ series. LoiLo’s GPU dual decode support introduces a stress free video editing for AVCHD, MP4, MOV, etc., and with NVIDIA® CUDA™ technology, encode is 10 times faster compared to CPU itself and with GPU accelerated video playback/editing and output LoiLo brings to you a powerful and stress free video editing.

### Super LoiLoScope & MSI graphic board features

#### **Stress free environment with full HD GPU dual decode**

Supporting: MSI NVIDIA® GeForce™ series

In order to preview the must have “transition” overlapping multiple videos and “superimpose” that allows you to view multiple videos together in real time, at least 2 full HD parallel playback is required. GPU and Dual Stream Decode ultimately decrease CPU usage and increase productivity. Over 3 stream playback/edit is even possible also with fast CPU.
