Press release

## **GAINWARD now bundles with Super LoiLoScope for NVIDIA graphic cards**

-Ultimate full HD video editing-

April 12<sup>th</sup>, 2010

**LoiLo inc.** with its principle place of business at Endo, Fujisawa, Japan, CEO: Koji Sugiyama, **bundled with GAINWARD**, a world leading graphics card manufacturer, and a premium brand of #1 NVIDIA board partner with the world's first GPU accelerated video editing software: **Super LoiLoScope now with GAINWARD NVIDIA® GeForce™ GTX470 and GTX480 series.**

LoiLo's GPU dual decode support introduces stress free video editing for AVCHD, MP4, MOV, etc., and with NVIDIA® CUDA™ technology, encode is 10 times faster compared to the CPU itself. With GPU accelerated video playback/editing and output, LoiLo brings powerful and stress free video editing.

### **Super LoiLoScope & GAINWARD graphic board features**

#### **Stress free environment with full HD GPU dual decode**

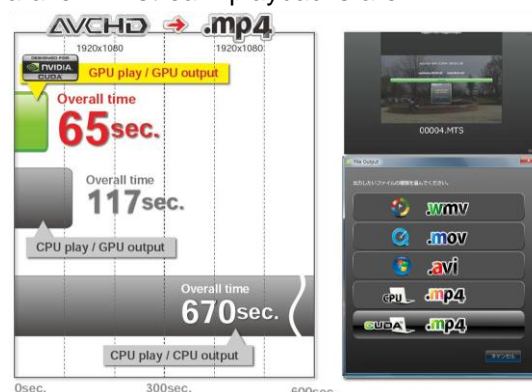

Supporting: GAINWARD NVIDIA® GeForce™ GTX470 and GTX480 and all Nvidia GeForce CUDA enabled 9500GT series, 9800GT series & GT/GTS/GTX 200 series.

In order to preview the must-have "transition" overlapping multiple videos and "superimpose" feature that allows you to view multiple videos together in real time, at least 2 full parallel HD stream playbacks are required. GPU and Dual Stream Decode ultimately decrease CPU usage and increase productivity. 3 or more playback/edit streams are possible if you also have a fast CPU.
