## LoiLoScope EX accepted as an internal PC application for JVC's new PICSIO.

August 24, 2010 - LoiLo Inc. (Headquarters in Kanagawa, Japan) has developed LoiLoScope EX for the new JVC PICSIO camera (GC-FM2, GC-WP10). The LoiLoScope EX software is embedded in the camera to eliminate the need to install it on to the PC. LoiLoScope EX is a social communication tool which allows you to easily edit the videos, pictures, and audio taken with the PICSIO, and the share them with your friends through Facebook, YouTube, Twitter, and Vimeo. The software supports 17 different languages.

Today, the JVC PICSIO (GC-FM2, GC-WP10) with LoiLoScope EX is announced. With the collaboration of a compact camera, LoiLo will provide a means of communication for your videos and pictures instead of just taking them.

<New features for LoiLoScope EX 1.8.2>

- **Boot from Camera**

Run the software from your camera by connecting your camera to your PC by USB. Easily edit videos on a friends PC or while on vacation and deliver them to your friends and family.

- **MP4 Smart Rendering**

Output videos taken with your PICSIO quickly while retaining audio and video quality.

Features only available from LoiLo: Visual check the Smart Rendering range before output.

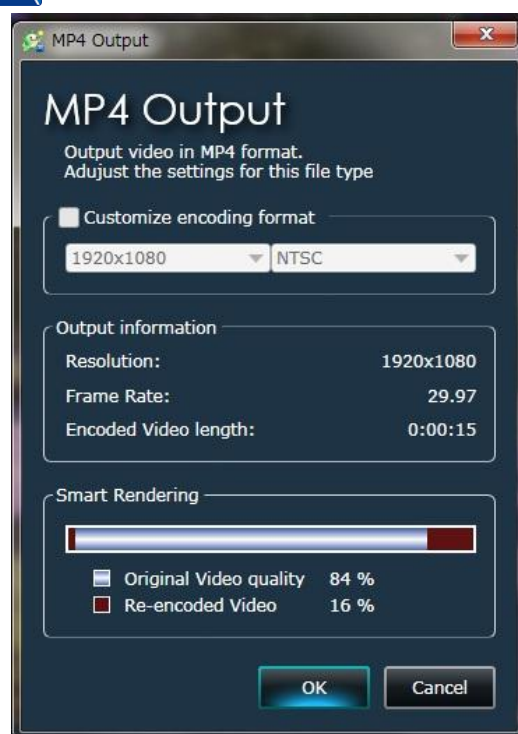

- Cut down on video output time by rendering only portions that need rendering
- Maintain high video quality with minimal rendering

- **Seamlessly display data from your camera in the media browser.**

Video, picture, and audio files will be displayed according to capture date.

- **Social Communication features of LoiLoScope EX**

- ✓ Send pictures and videos to friends on Facebook
- ✓ Send private, password protected videos by e-mail using Vimeo
- ✓ Automatically share videos uploaded to YouTube on Twitter and Facebook.
