Scribble your way through video editing with Super LoiLoScope VENUS! Create your own professional-like master piece

On July 7th, 2009 - LoiLo Inc. (Kanagawa, Fujisawa-city, CEO: Koji Sugiyama) has released the latest version of the Full HD movie editing software "Super LoiLoScope VENUS" simple and available for people of all ages. In addition to all the high-speed Full HD video editing and output features, Super LoiLoScope VENUS aims to bring out the users creative potential to create a master piece, which was extremely difficult for even the professionals.

Search and display all the files on the driver with our new media browser feature, select your favorite videos to begin scribbling as if you are drawing a picture, add-in animation graphics, and include different types of effects to specific area of the video and create a master piece you would be proud enough to share it with many of your friends!

"With VENUS, video editing is now more than just video editing but is also a communication tool for people of all ages and any occasions. Kids scribbling their own video with their friends on the screen, creating a memorial gift for your best friend's birthday with memorial videos and messages, parents creating a file with an arrow pointing at their children during the sports festival and blurring the other people surrounding them for privacy to upload it onto their BLOG and to share it with their network of friends.", says CEO: Koji Sugiyama commenting that with this, new type of creators will start to appear.

From July 7th to July 21st, there will be a campaign price lowered at \$59 from \$88.

Super LoiLoScope VENUS main features:

- Media browser: Search and display all video, music, and picture files on the driver.
- Deco-Pen: Scribble directly on video files as if you are drawing. Scribbles may be animated.
- Deco-Stamp: Stamp directly on video files even during preview mode. Animated stamps available.
- Effect-Pen: Apply different effects only in specific areas of the video file
- Play mode: 7 different speed modes. (*0.1,*0.2,*0.5,*1,*2,*4,*8)
- Animation feature: Record animation free-handedly or by pause/key frame method.
- Transition feature: Change level and timing of the transparency mode. Auto/Manual setting available.
- Available languages: English, Japanese, German, French, Spanish, Portuguese, Traditional & Simple Chinese, and Korean
